

**Crimata**

Let's rethink personal computing

## The missing piece

There is no mainstream device that serves your digital hub

## Introducing Crimata

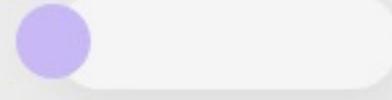

A device for hosting your files, photos, email, websites, and more

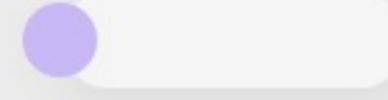

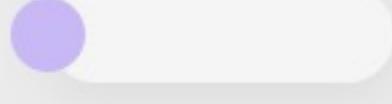

valoria.net

rivelle.com

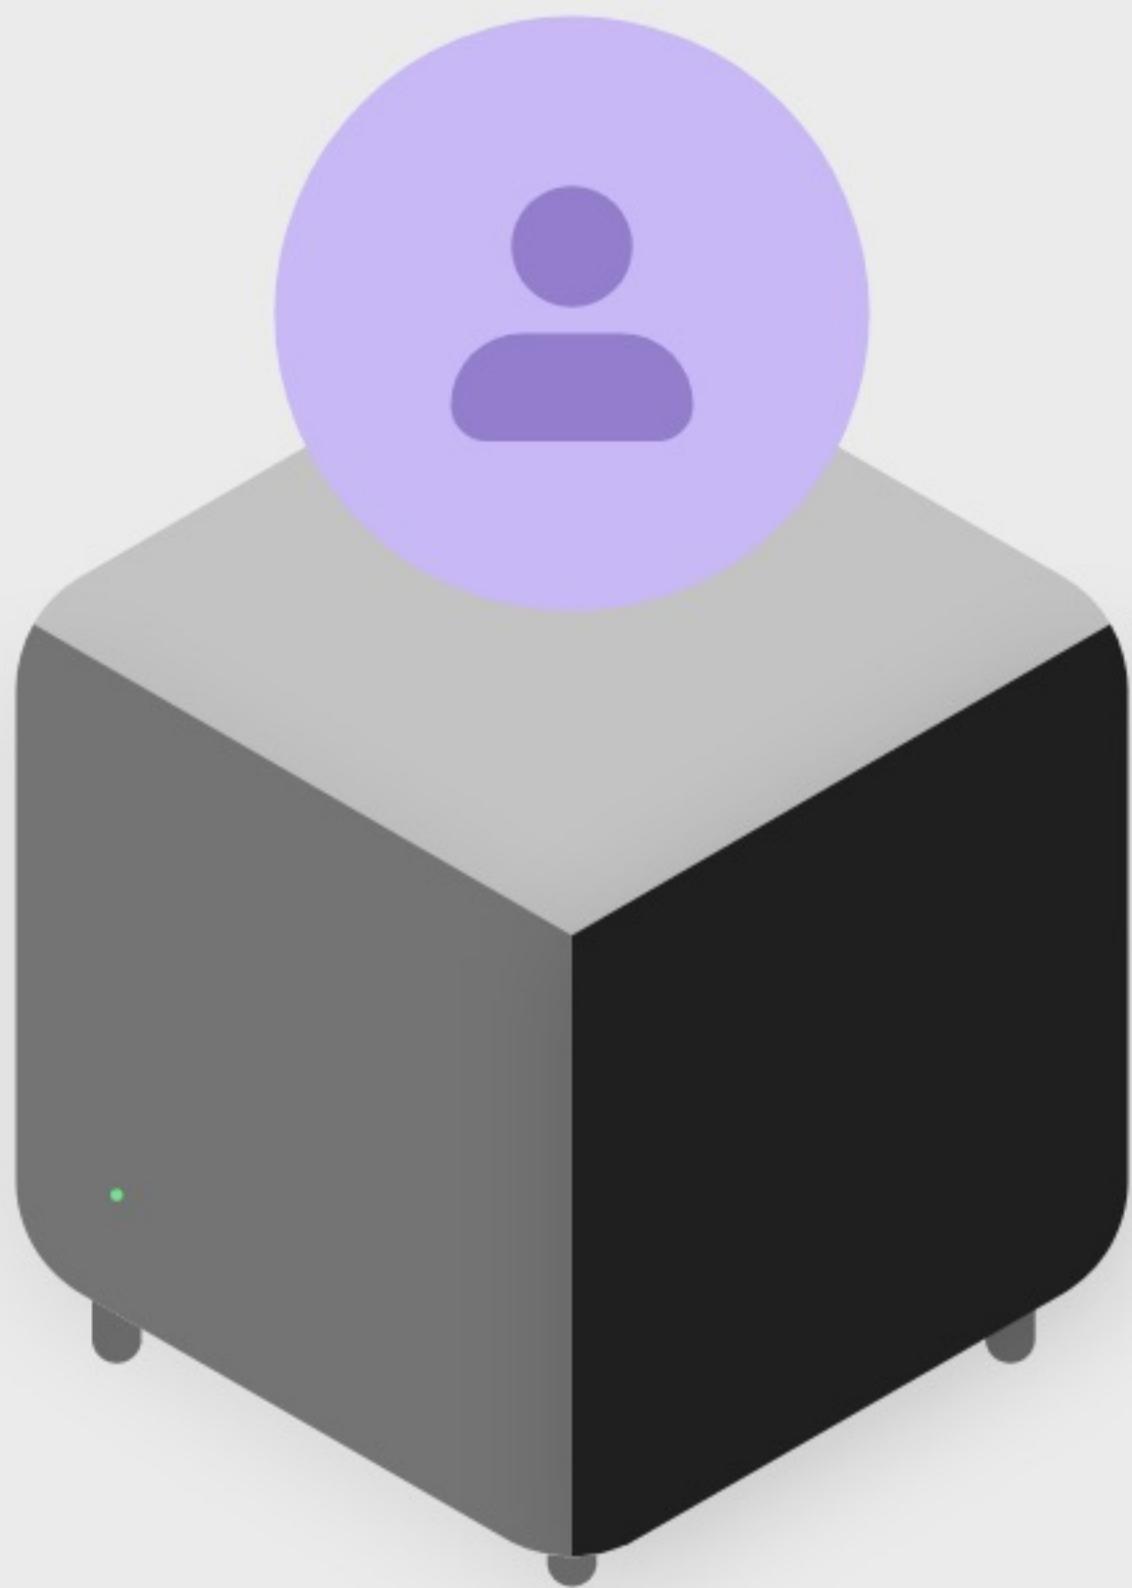

gundersen.net

lunaris.xyz

## Mission

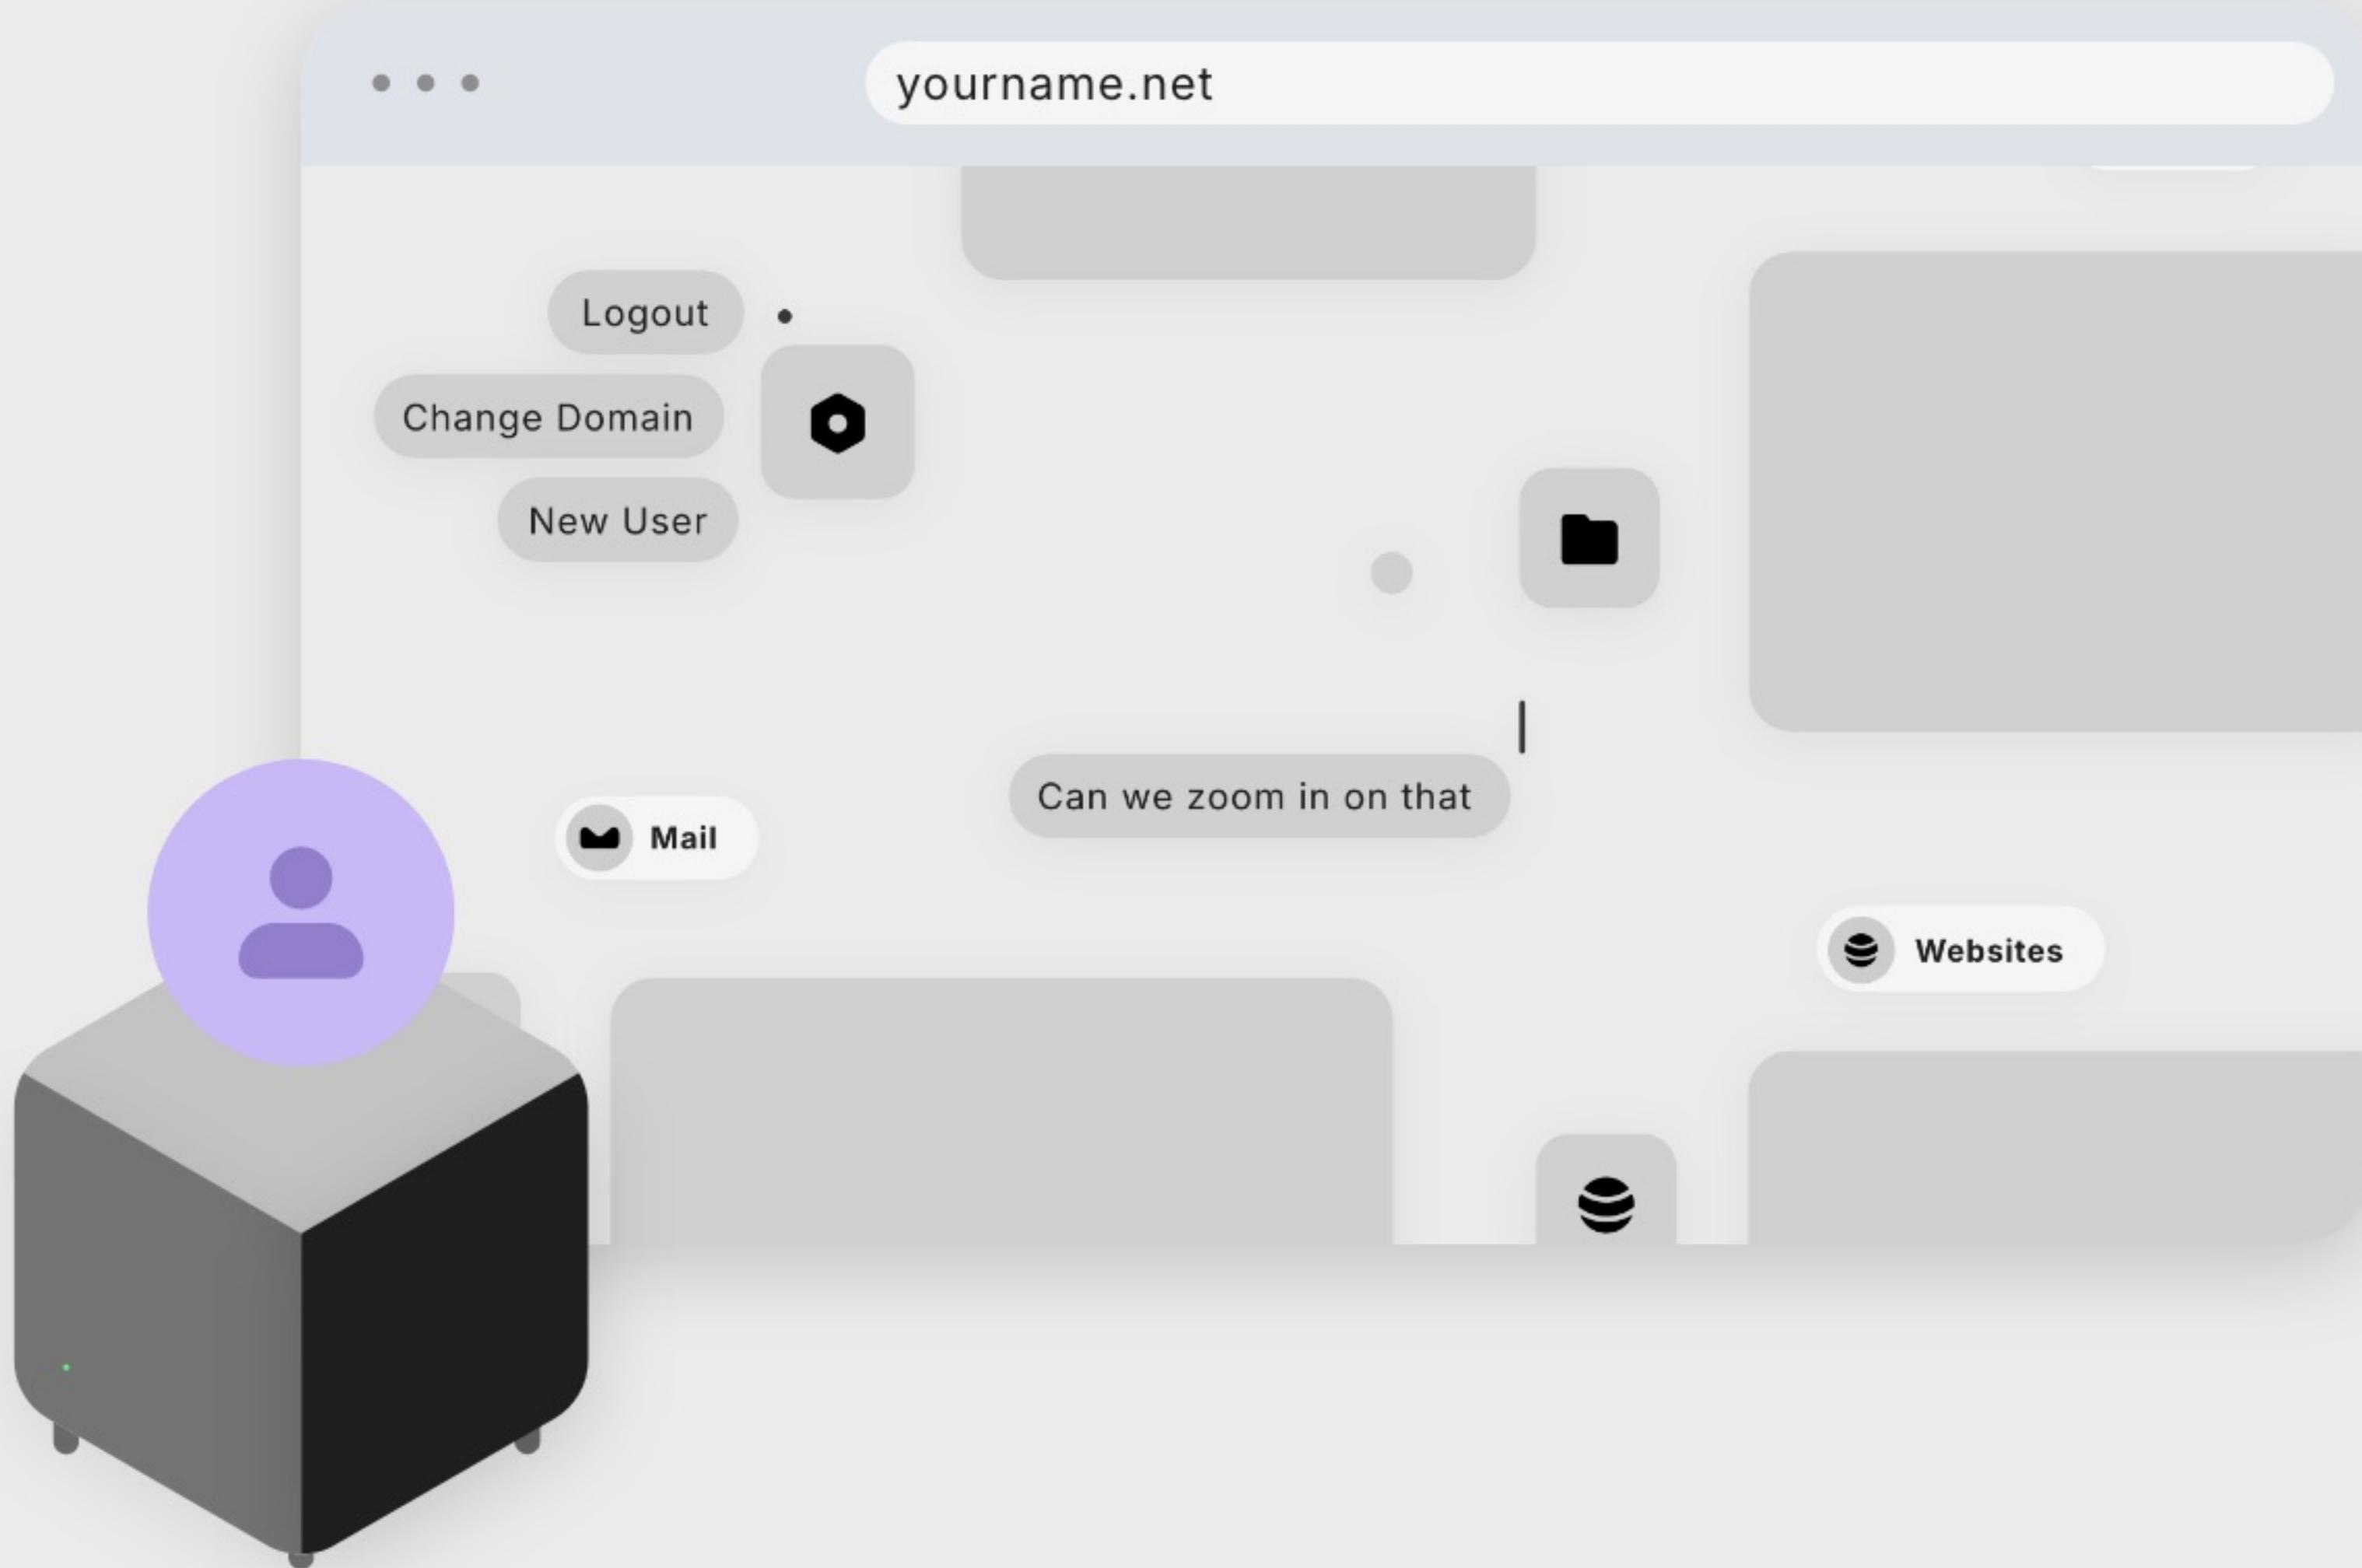

We're making a product that works for you, and promotes a distributed internet

**yourname.net** 243.123.735.12

## Setup

Turn it on and choose a domain name

## Access

Your Crimata through any internet browser, or...

andrew@gundersen.net

## Link

To popular apps like Apple Mail

 **Settings**

 **Files**

Logout

Change Domain

New User

Can we zoom in on that

 **Mail**

 **Websites**

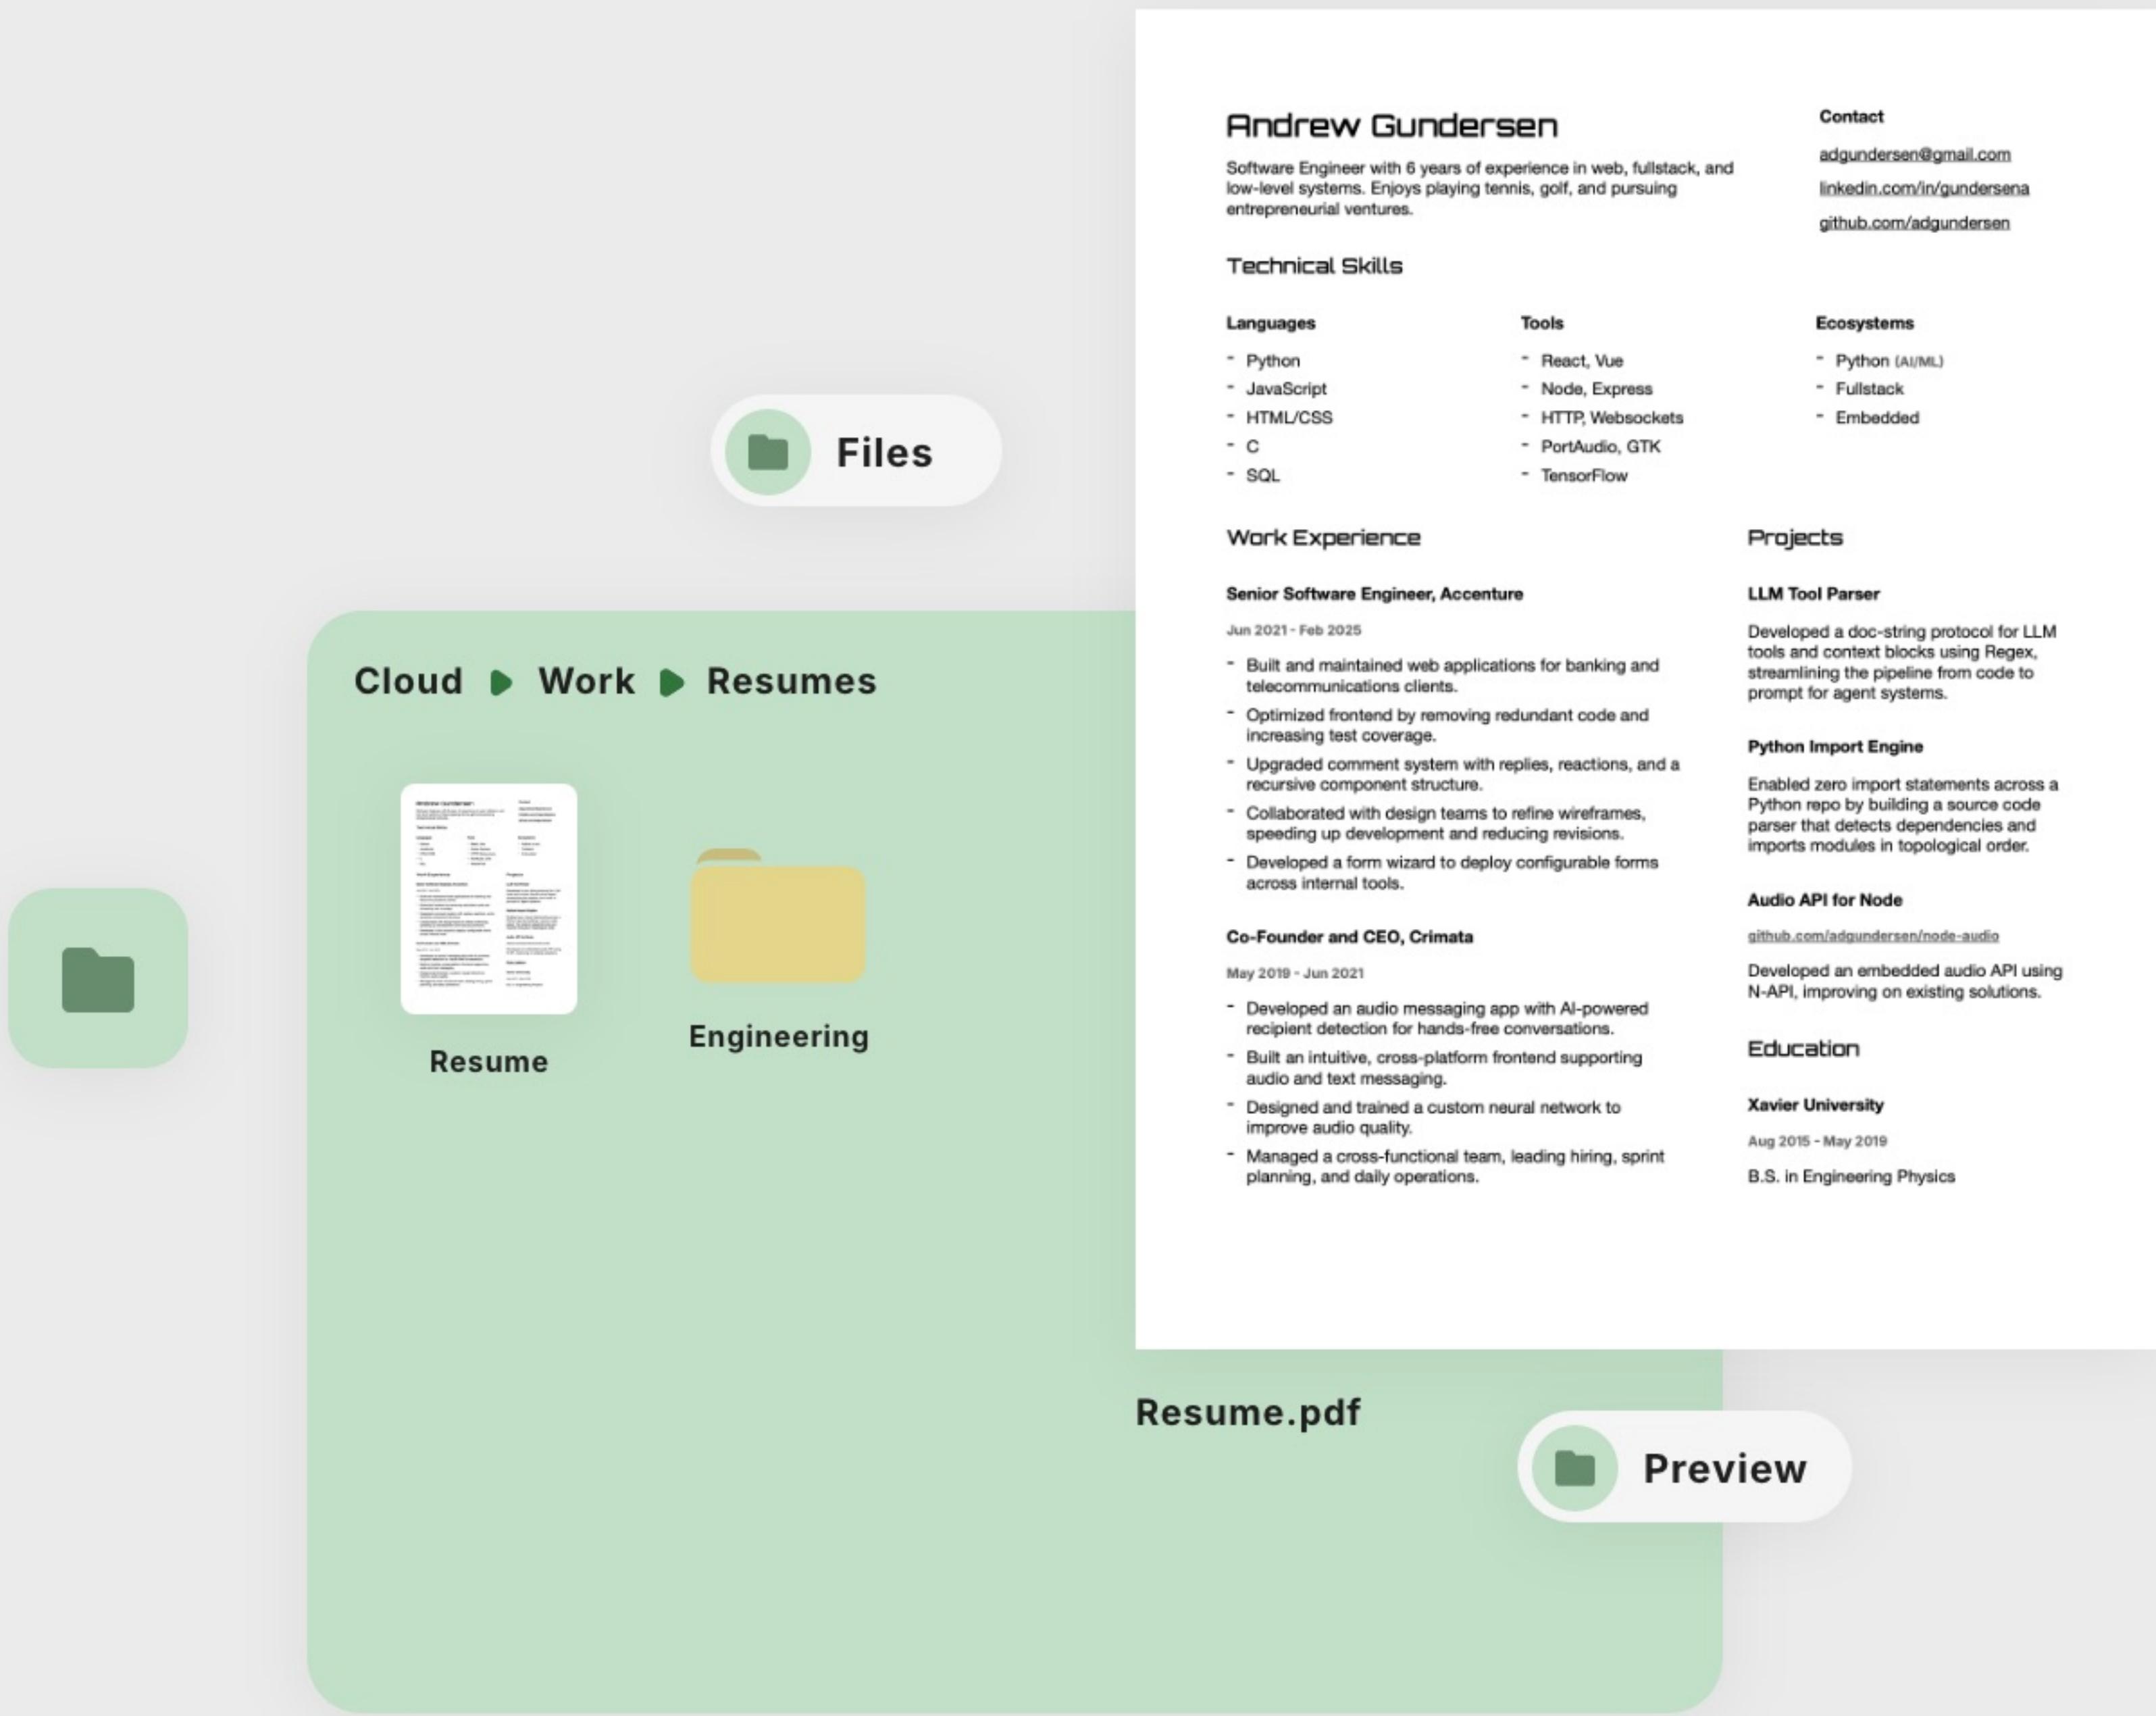

**UI**

Futuristic and intuitive

## Cloud

Manage your files and photos with **2TB** of storage

**Cloud ➔ Work ➔ Resumes**

**Preview**

### Andrew Gundersen

Software Engineer with 6 years of experience in web, fullstack, and low-level systems. Enjoys playing tennis, golf, and pursuing entrepreneurial ventures.

#### Contact

adgundersen@gmail.com  
linkedin.com/in/gundersena  
github.com/adgundersen

#### Technical Skills

##### Languages

- Python
- JavaScript
- HTML/CSS
- C
- SQL

##### Tools

- React, Vue
- Node, Express
- HTTP, Websockets
- PortAudio, GTK
- TensorFlow

##### Ecosystems

- Python (AI/ML)
- Fullstack
- Embedded

#### Work Experience

##### Senior Software Engineer, Accenture

Jun 2021 - Feb 2025

- Built and maintained web applications for banking and telecommunications clients.
- Optimized frontend by removing redundant code and increasing test coverage.
- Upgraded comment system with replies, reactions, and a recursive component structure.
- Collaborated with design teams to refine wireframes, speeding up development and reducing revisions.
- Developed a form wizard to deploy configurable forms across internal tools.

##### Co-Founder and CEO, Crimata

May 2019 - Jun 2021

- Developed an audio messaging app with AI-powered recipient detection for hands-free conversations.
- Built an intuitive, cross-platform frontend supporting audio and text messaging.
- Designed and trained a custom neural network to improve audio quality.
- Managed a cross-functional team, leading hiring, sprint planning, and daily operations.

#### Projects

##### LLM Tool Parser

Developed a doc-string protocol for LLM tools and context blocks using Regex, streamlining the pipeline from code to prompt for agent systems.

##### Python Import Engine

Enabled zero import statements across a Python repo by building a source code parser that detects dependencies and imports modules in topological order.

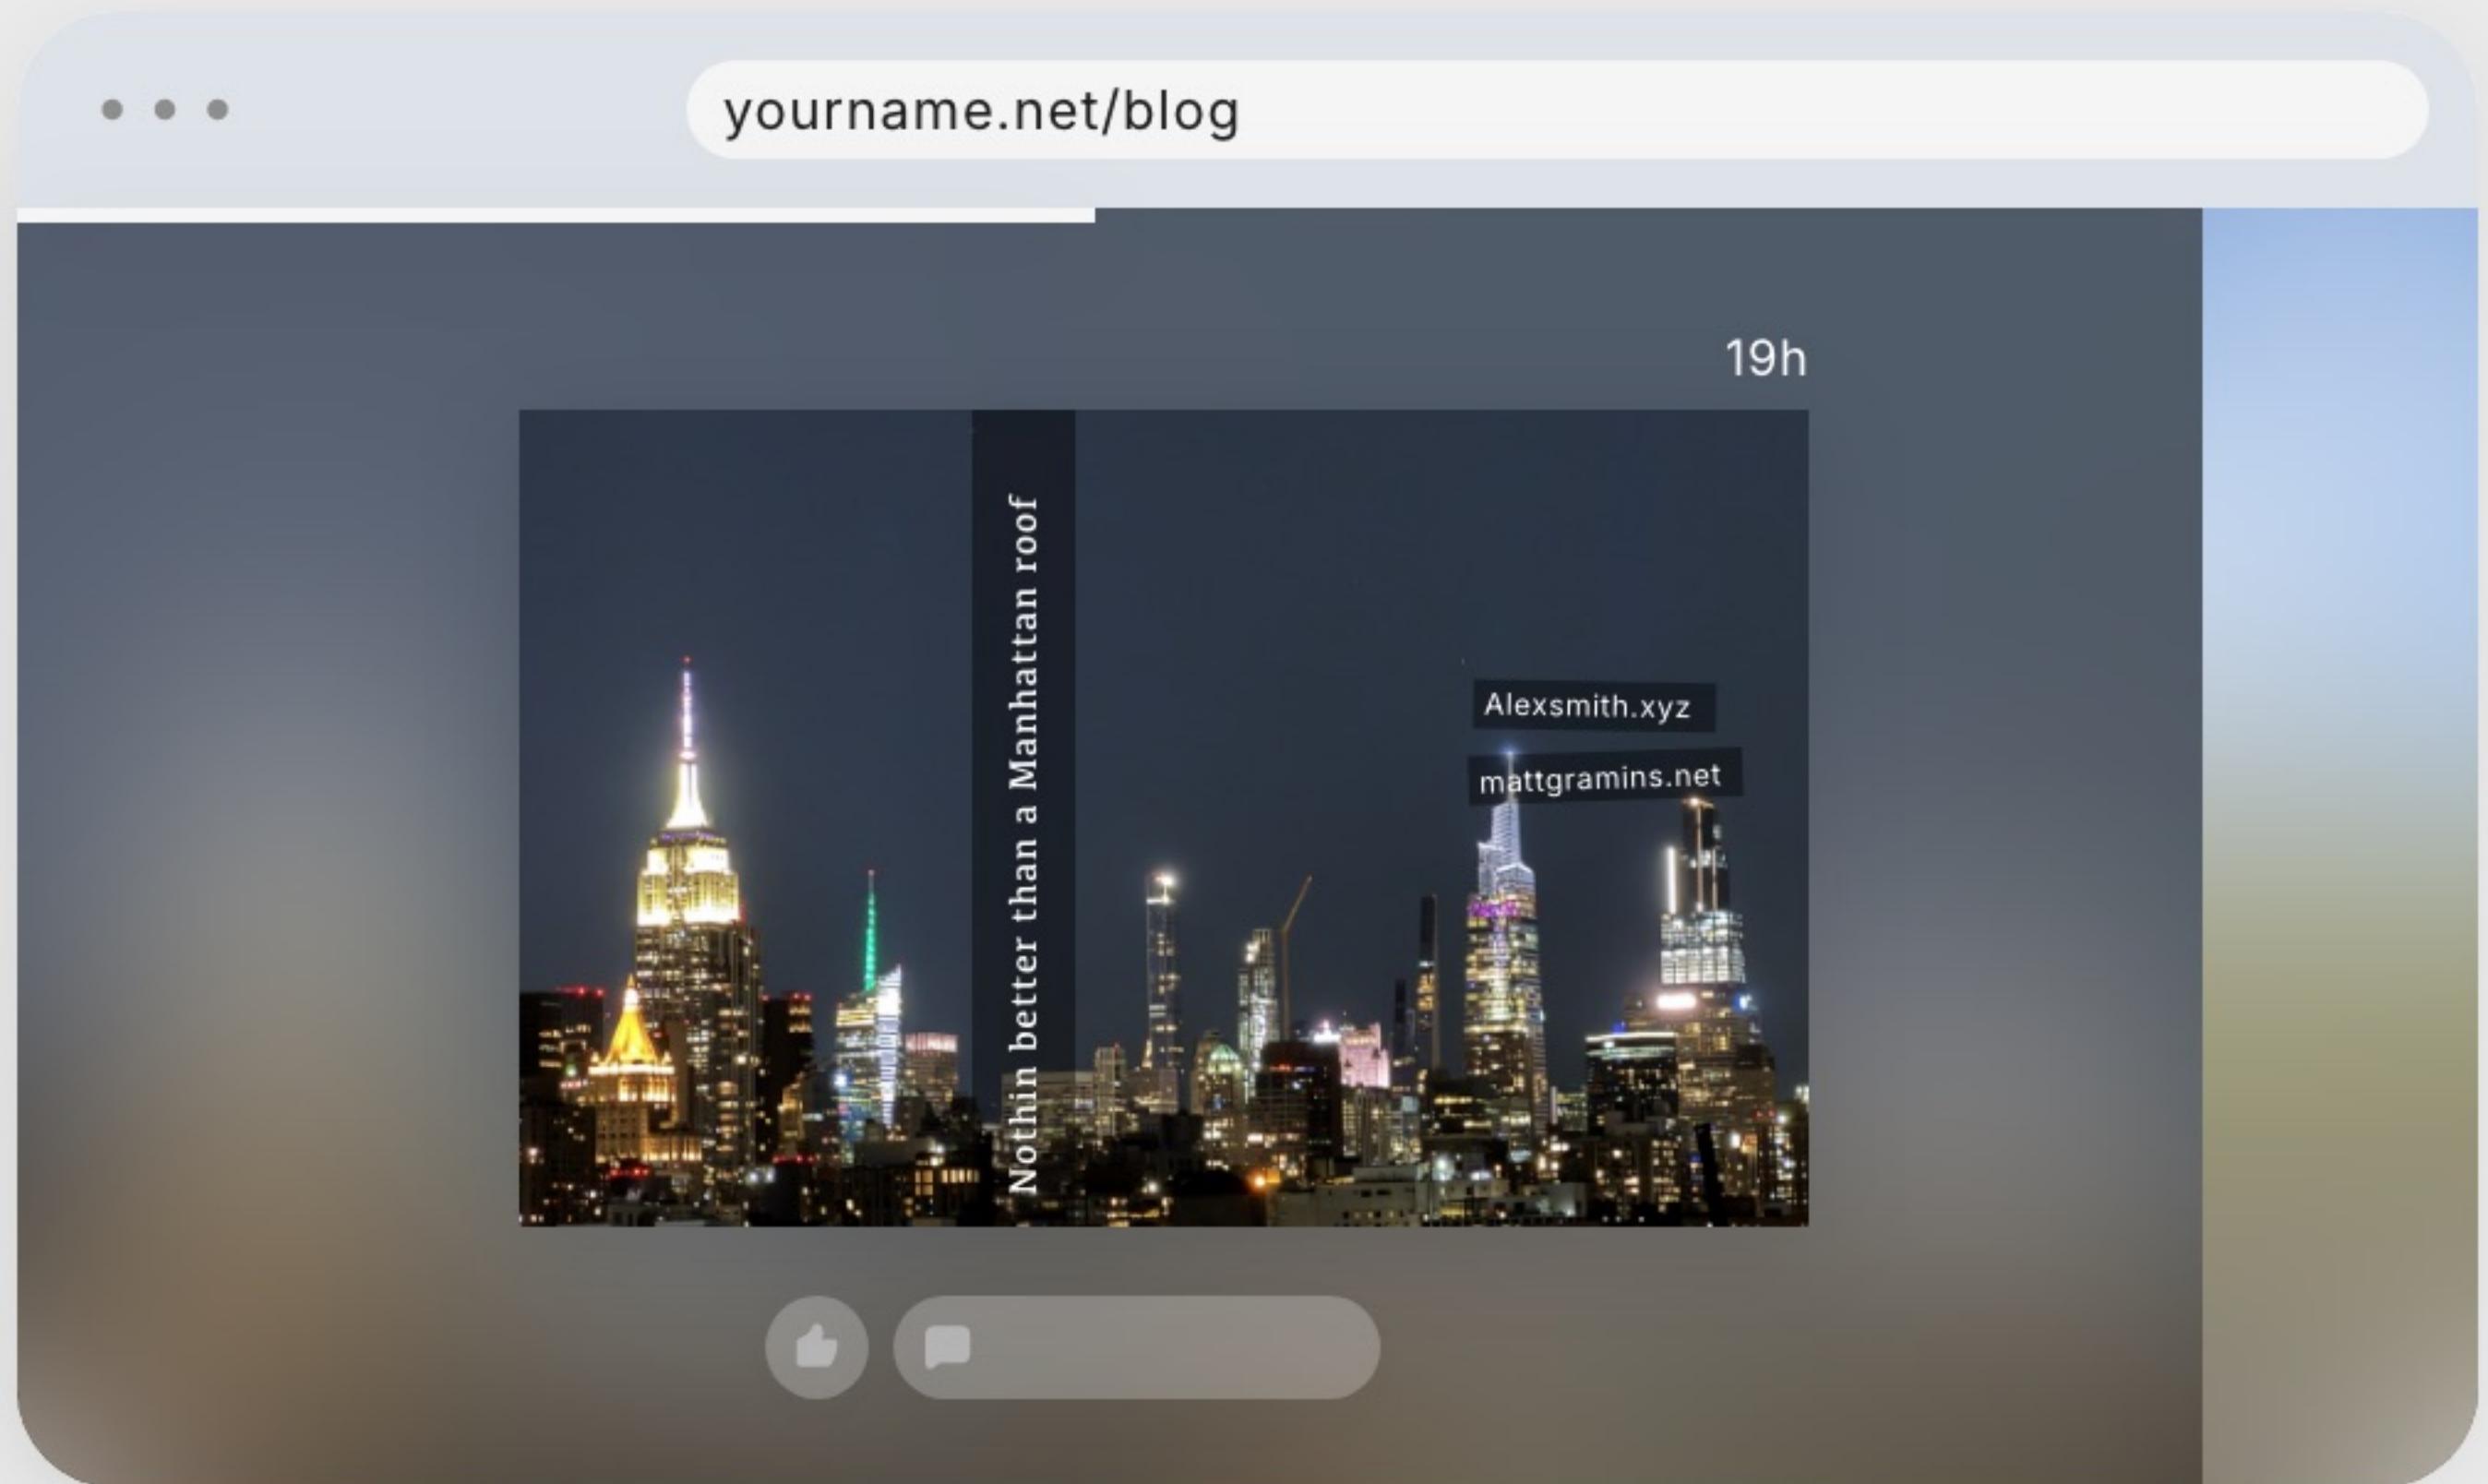

##### Audio API for Node

github.com/adgundersen/node-audio  
Developed an embedded audio API using N-API, improving on existing solutions.

#### Education

##### Xavier University

Aug 2015 - May 2019  
B.S. in Engineering Physics
